SUMMARY

Full Stack Software Engineer with over two years of professional experience developing, testing, and delivering enterprise web applications for the aviation industry. Experienced across the complete Software Development Life Cycle (SDLC), including requirements gathering, business analysis, solution design, implementation, testing, and collaboration with stakeholders to deliver reliable and maintainable software. Proficient in building modern frontend applications with React and TypeScript and scalable backend services using Django and FastAPI. Experienced in quality assurance through manual testing, test case design using JAMA, and end-to-end test automation with Playwright. Comfortable working in remote, cross-functional teams within an international software development environment.

PROFESSIONAL EXPERIENCE

Software Engineer, EthioDen ICT Consultancy (Remote –Assigned 09/2024 – 09/2026 | Bahir Dar, Ethiopia to Tern Systems, Iceland)

- Participated in requirements gathering, business analysis, and solution design with stakeholders and product managers.
- Collaborated daily with product managers, software engineers, and QA teams at Tern Systems in a remote international development environment.
- Participated in sprint planning, technical discussions, feature reviews, and daily stand-up meetings.
- Designed and developed **web-based aviation software systems** using React, TypeScript, Django, and FastAPI.
- Developed LDAP-based authentication and user management solutions.
- Implemented new features and resolved software defects based on business requirements.
- Prepared feature implementation proposals and technical documentation.
- Designed manual test cases using JAMA.
- Developed automated end-to-end test scripts using Playwright.
- Reported, tracked, and verified software defects in collaboration with the development team.
- Contributed to the full Software Development Life Cycle (SDLC), including software development, testing, and quality assurance for aviation software solutions.

Software Engineer

12/2022 – 03/2023 | Addis Ababa, Ethiopia

Dan Energy Research and Development PLC

- Conducted research on infrastructure development across African countries as part of a multidisciplinary team.
- Reviewed and analysed research documents from multiple sources.
- Presented research findings and collaborated with team members.

EDUCATION

Bahirdar Institute of Technology

10/2017 – 08/2022 | Bahirdar, Ethiopia

Bachelor of science in Software Engineering

CGPA: 3.61/4.00

SKILLS

Programming Languages (Python, TypeScript, JavaScript, Java, C++, C, SQL) | **Frontend** (React, HTML5, CSS3) | **Backend** (Django, FastAPI, Node.js) | **Databases** (PostgreSQL, SQLite) | **Development Tools** (Git, GitHub, GitLab, Docker, WSL) | **Quality Assurance** (Playwright, JAMA (Test Case Management))

LANGUAGES

Amharic | English

PROJECTS

Nexus 02/2026 – Present

- **Client:** Ethiopian Civil Aviation Authority (ECAA), HangaroControl, eSAVEA
- **Role:** Quality Assurance Engineer
- **Tech Stack:** TypeScript • FastAPI • JAMA • Playwright
- A web-based operational platform that provides air navigation personnel with centralised access to essential operational information through a single window.
- **Key Contributions**
 - Designed and maintained test cases using JAMA.
 - Performed manual functional and black-box testing.
 - Reported and verified software defects with the development team.
 - Contributed to ensuring software quality before production releases.

Nexus Ethiopia, Nexus Reporting System 01/2025 – 02/2026

- **Client:** Ethiopian Civil Aviation Authority (ECAA)
- **Role:** Full Stack Software Engineer
- **Tech Stack:** React • Django • SQLite • LDAP
- A web-based reporting system developed to replace paper-based operational records with a centralised digital platform accessible by authorised personnel nationwide.
- **Key Contributions**
 - Participated in requirements gathering, system analysis, and solution design.
 - Developed frontend and backend features using React and Django.
 - Implemented LDAP-based authentication and user management.
 - Developed modules for incident reports, operational logs, shift handovers, permits, notes, and other operational records.
 - Prepared feature implementation proposals and technical documentation.
 - Collaborated with stakeholders throughout development and testing.
